NATIONALLY RECOGNISED
TRAINING

With our ICT50615 Diploma of Website Development, you will hone the website design and development skills needed to build highly engaging, dynamic and mobile-friendly websites for the future. You will also develop the skills required to enter the website development industry as both an independent contractor (Freelancer) and as part of a development team, using industry-standard software such as the Adobe Creative Cloud, content management systems such as WordPress and industry-standard frameworks such as Bootstrap.

If you have a passion for creativity that serves many purposes and want to work in a fluid and ever-changing industry, then a career in website development may be for you.

The benefits of completing a Website Development Diploma:

- Foundation website development skills that allow you to create endless layouts
- Advanced website development skills to work on e-commerce and large-scale business websites
- Client and project management skills for small and large-scale projects
- Clear articulation pathways for higher education and on-going career development

You'll learn to:

- Create engaging, creative and dynamic web pages that captivate your target audiences
- Learn to and create web pages using web languages such as HTML5, CSS3, PHP and JavaScript
- Develop mobile-friendly websites that change appearance to suit different devices
- Design, build and implement databases, database tables and integrate these with websites
- Understand new web technology trends and learn how you can implement them
- Reduce security risks through preventative measures to create robust solutions

Career Opportunities

- PHP Programmer
- Database Administrator
- Front-end Web Developer
- Project Manager
- Web Application Developer

Course Structure

Our ICT50615 Diploma of Website Development has 20 units structured into 3 major clusters of learning. Each cluster contains units grouped into core study areas that are covered during the 18-month qualification.
